

Product Specification of Decibel Ceiling Fabric
Acoustical Wall Paneling

| 1 | Description |
|---|---|
| | <p>Providing and fixing of Decibel Ceiling Fabric Acoustical Wall paneling 25mm thick with square edge made of fiber glass substrate wrapped on the front side with an acoustically transparent and fire-resistant fabric with an option of color as per the choice of the Architect/Engineer in charge of size 2400X600, 1800X600, 600X1200 or 600X600mm providing a minimum sound absorption level of 0.90 NRC to be affixed to wall using Wall Panel impellers.</p> |
| 2 | Installation |
| | <p>Wall Panel impeller of adequate quantity as specified by the manufacturer shall be fixed to the wall surface using self-tapping screws. Silica based construction adhesive shall be dabbed on to the projecting elements (spikes) of the impellers. Fabric wall panels shall be pierced through the spikes of the impeller ensuring the line and level of the panels are maintained.</p> |
